

"A Sulky and Gang Plow" Newspaper Article, September 16, 1874

A Sulky and Gang Plow is one of the new things for the making farm work easy, and of enabling one man or boy to do the work of two men, to be found at the hardware stores of Nelson & Peterson in Red Wing. These plows, the Sear's Sulky and Gang Plows, with the Diamond Plow attached, are arranged with two plows attached to a sulky so that a man can ride and drive turning two furrows at once, relieving the fatigue of this part of farm work. They are said to do work with the least labor to both teams and driver of any thing that has been offered in the market.
